

QUANTUM LEARNING FOR TEACHERS EVALUATION

QUANTUM LEARNING: 5-MINUTE SURVEY

Over 10,000 of the teachers trained in Quantum Learning methods have evaluated the program. At the end of each Quantum Learning training, teachers are given a short survey and asked to rate the program on a scale of 1-10, 10 being the highest rating. These average scores are listed below.

	AVERAGE RATING (Scale of 1-10)
How effective was the presentation?	9.49
How motivating was the workshop?	9.52
How clear was the information?	9.44
How useful was the information?	9.40

In a separate study, prepared by Lucretia D. Peebles, Ph.D and Karen Deschryver, M.A. at the University of Denver, evaluators distributed the same Quantum Learning 5-Minute Survey. Overall 296 participants from 11 schools responded to the survey.

How effective was the presentation?

63.9% of the participants rated the effectiveness of the presentation as a 10. Given this rating one may conclude that the presentation was extremely effective.

How motivating was the workshop?

65.9% of the participants rated the motivation of the workshop as a 10 and 17.9% as a 9. Given that 83.8% of all participants rated the workshop motivation with a score of 9 or higher, one may conclude that the participants were very motivated.

How clear was the information?

59.1% of the participants rated the clarity of the information as a 10 and 26% as a 9. Given that 85.1% of the participants rated clarity of information with a score of 9 or higher, one may conclude that the information was very clear.

How useful was the information?

61.1% of the participants rated the usefulness of the information as a 10 and 20.3% as a 9. Given that 81.4% of the participants rated usefulness of information with a score of 9 or higher, one may conclude that the information was useful.
